The people who respond to your inquiries are volunteers who do this in addition to their professional and personal lives. It can happen that an email gets lost, but most of the time, sending the same email to several people is counterproductive. **Please do not send the same request to several people.**

To give you an idea of the difficulty of our tests and to prepare you for it, we advise you to take our preliminary test below, with automatic correction. This test is only a preliminary test which only gives an idea of what a real general intelligence test could be. There is nothing definitive about it. It is also possible that this is the first time in your life that you have answered these kinds of questions and that you are confused, which is why we encourage you to take this preliminary test so that you can get an idea of what could be a real test of general intelligence and what your results could be on a real test of general intelligence.

This test consists of 40 questions and will allow you to quickly and anonymously assess your chances of success during a test session organized by Mensa. To obtain a reliable result you should not spend more than 30 minutes on this test.

You can also take the following pretest ([pdf file](#)) and return it completed to pretests@mensa.fr or to the address indicated on the document. In both cases, the results will be communicated to you **within 2 months** and after receipt of **three postage stamps at the letter rate** at the address: MENSA France Prétests - 67 rue Saint Jacques - 75005 PARIS.

We ask you to indicate your name, first name and **address** in a **LEGIBLE** manner ; otherwise it will be difficult for us to send you your results.

We strongly advise you, if you obtained a high score on this preliminary test, to come forward to be notified of the next test sessions in your region. [For more information](#)

End of the preliminary test

You took the Mensa pre-test and got 35 correct answers!
