

Result

Your IQ is intended to be: **133**

Calculated using scatter 15

An IQ between 85 and 115 at spread 15 is within what is called the normal range. To become a member of Mensa, you must have an IQ of 131 or more at this spread.

This test comes with some uncertainty, but you have scored quite high - maybe you want to try your hand at the official IQ test?

Go to: Mensa's entrance test (</iq-test-event-list>)

Go to: Mensa's website (</>)

Normal distribution diagram, source: Wikipedia (https://commons.wikimedia.org/wiki/File:IQ_distribution.svg)

The fun test on www.mensa.dk is based on [IQtest.dk](http://iqtest.dk) (<http://iqtest.dk>) developed by Anders Ditlev Jensen, MD. HTML version of the test was developed by John VB Doktor.
