WELL-BEING INDICATORS

11/26

Moderate indices of well-being have been detected.

Optimal range: 14-26
Score: 11

COGNITIVE PROFILE

22 /22

High indices of cognitive performance have been detected.

Optimal range: 17-22
Score: 22

EVALUATED INDICATORS	LOW WELL-BEING	NAMIT GAUR
Physical well-being	0-2	1
Psychological well-being	0-5	8
Social well-being	0-1	2
Cognitive profile	0-10	22

CONCLUSIONS

- We recommend that Namit Gaur start training to improve weak cognitive skills and continues practicing healthy habits.
- We recommend starting a personalized brain training program from CogniFit.

Use this 25% off code to get a discount on your brain training program: **CABGENERAL**.

OO DESCRIPTION OF THE GENERAL COGNITIVE ASSESSMENT (CAB)

Namit Gaur took the General Cognitive Assessment (CAB) on 09/06/23 at 46 years-old.

The General Cognitive Assessment (CAB) from CogniFit is a complete cognitive test designed to help detect the cognitive state in people through online cognitive tests. This General Cognitive Assessment (CAB), which evaluates cognitive functions has been used by millions of users over the last 15 years.

This neurocognitive assessment tool helps evaluate a wide range of cognitive abilities and healthy habits that are closely related to correct cognitive functioning.

The automated report from this cognitive evaluation provides conclusions on the functioning of the different brain areas and functions.

THE CAB REPORT HAS THREE MAIN PARTS:

01

WELL-BEING INDICATORS

The answers from the questionnaire will be focused on the following areas:

- Physical Well-being
- Psychological Well-being
- Social Well-being

02

COGNITIVE PROFILE

In this section, you will see a circular diagram next to each evaluated area, which will indicate the user's score based on their percentile and normalized for their age and gender. For example, a score of 500 would be calculated depending on the user's age group. CogniFit's values are calculated in percentiles but are shown adjusted on a scale of 0-800. As such, the higher score, the better.

Green: Cognitive strengths
Yellow: Below-average cognitive skills
Red: Cognitive weaknesses

03

CONCLUSIONS

At the end of the report, you will find:

- A description of the user's physical well-being index, psychological well-being, and implications on the cognitive profile.
- Specific recommendations and a personalized plan of action.

01 WELL-BEING INDICATORS

The concept of quality of life is a wide concept that encompasses physical, mental, social, material, emotional, and cognitive well-being. Proper functioning of cognitive performance is the product of a number of factors like nutrition, sleep, external stimuli, occupation, or studies. The WHO defines health as: "A state of complete physical, mental and social well-being and not merely the absence of disease or infirmity." CogniFit is an online prevention and cognitive health instrument.

!

NAMIT GAUR IS IN GOOD PHYSICAL, PSYCHOLOGICAL AND SOCIAL HEALTH BUT COULD IMPROVE SOME COGNITIVE ABILITIES.

PHYSICAL WELL-BEING
POOR WELL-BEING
Recent studies have provided valuable information to help us understand the close relationship between physical and mental well-being. Sleep, diet, and exercise are all factors that determine physical well-being and condition proper cognitive function.

1/6

PSYCHOLOGICAL WELL-BEING
MODERATE WELL-BEING
Psychological well-being would include cognitive, affective and emotional aspects in the different areas of human life.

8/15

SOCIAL WELL-BEING
MODERATE WELL-BEING
A rich and consistent social life can help cognitive and mental health. Being with other people causes us to learn to adapt to others, and implies empathy, downtime, fun, and sense of company and community.

2/5

MODERATE WELL-BEING

COMPLETE WELL-BEING REPORT
FOR NAMIT GAUR

According to the results, Namit Gaur shows an index of physical well-being that is below average for their age. We recommend bringing this information to a professional.

Physical Well-being

Social Well-being

Psychological Well-being

NAMIT GAUR'S PROFILE

LOW RISK   MODERATE RISK   HIGH RISK

IN DETAIL:

PHYSICAL WELL-BEING
POOR WELL-BEING

Namit Gaur shows a poor physical well-being index. Studies have related physical well-being with the absence of diseases and as a prevention mechanism, which makes it possible to enjoy good physical and mental health.

Namit Gaur has responded negatively to the following items that are related to high physical well-being:
- Often exercises or works out.
- Feels well physically.
- Watches what they eat and eats well.
- In good physical and psychological health (without recent health problems)
- Feels well and has energy.

PSYCHOLOGICAL WELL-BEING
MODERATE WELL-BEING

Namit Gaur presents a moderate index in the area of psychological well-being. Psychological well-being is how well our mental and emotional processes function, as well as the manner in which our cognition makes it possible to carry-out a number of tasks, like reading a book, shopping, remembering plans, having a conversation with friends, or solving every-day problems.

Namit Gaur has responded negatively to the following items that are related to high psychological well-being:
- Easily remembers directions and streets.
- Is usually focused and doesn't make mistakes.
- Usually concentrates on what they're reading.
- Likes to plan daily activities.
- They organize their time well.
- Has the same memory as when they were younger.
- Easily concentrates at work or at school.

SOCIAL WELL-BEING
MODERATE WELL-BEING

Namit Gaur has shown a moderate social well-being index. Social well-being is the perception and relationship that we have with others. Rich and healthy relationships make it possible for the brain to adapt to different opinions, understand others, become more empathetic.

Namit Gaur has responded negatively to the following items that are related to high social well-being:
- Has friends and makes plans with them.
- Is a student.
- Is working.

02 COGNITIVE PROFILE

In this section, you will see a circular diagram next to each evaluated area, which will indicate the user's score based on their percentile and normalized for their age and gender. For example, a score of 500 would be calculated depending on the user's age group. CogniFit's values are calculated in percentiles but are shown adjusted on a scale of 0-800. As such, the higher score, the better.

NAMIT GAUR'S RESULTS FROM THE EVALUATION SHOW A HIGH-PERFORMANCE COGNITIVE PROFILE.

REASONING

712/800
Ability to efficiently use (organize, relate, etc.) acquired information.

MEMORY

731/800
Ability to retain and manipulate new information and recover past memories.

ATTENTION

706/800
The ability to filter distractions and concentrate on relevant information.

COORDINATION

719/800
The ability to efficiently and precisely carry out organized movements.

PERCEPTION

594/800
Ability to interpret stimuli from the environment.

CogniFit

GOOD WELL-BEING

COMPLETE COGNITIVE REPORT FOR NAMIT GAUR

Namit Gaur shows an **excellent cognitive profile**. The results from the evaluation show that Namit Gaur's **strengths** are reasoning, memory, attention, coordination and perception. No cognitive weaknesses have been found in Namit Gaur's cognitive profile.

NAMIT GAUR'S PROFILE

LOW RISK   MODERATE RISK   HIGH RISK

CogniFit
IN DETAIL: COGNITIVE AREAS

REASONING

712/800

800

637
PROCESSING SPEED
Score Received: 637

Namit Gaur has received a high score in processing speed. Processing speed can be defined as the time it takes a person to do a mental task. Example: recognizing simple visual patterns in visual exploration tasks, judging which tests will require decision making, doing mental math, or perform reasoning tasks under pressure.

800

708
SHIFTING
Score Received: 708

Namit Gaur has received a high score in the area of shifting. It's the ability to redirect attention from one information channel to another. For example, you're taking care of a baby. He is sound asleep and you start reading an interesting article in the newspaper. When you hear the baby cry, you immediately switch from reading to attending to the baby.

800

791
PLANNING
Score Received: 791

Namit Gaur has received a high score in the area of planning. It is the ability to "think into future" and mentally anticipate the best way to carry-out a task. Example: You're going to have a busy day, so you'll have to plan your time to make sure you're able to make it to work, to the gym, the bank, and your family dinner.

MEMORY

731/800

800

492
CONTEXTUAL MEMORY
Score Received: 492

Namit Gaur has received a high score in the area of contextual memory, which is the ability to memorize and recognize the real source of a specific memory. Example: Someone tells you a story and you realize that you've heard it before. You think about it and remember that your grandma told you years ago on a rainy afternoon.

800

692
NAMING
Score Received: 692

Namit Gaur has received a high score in naming. It is the ability to remember and recover a word from our vocabulary, people's names, animals, objects, etc. Example, you're walking down the street and see someone you went to school with. You have to remember their name quickly and without hesitation.

800

764
NON-VERBAL MEMORY
Score Received: 764

Namit Gaur has received a high score in non-verbal memory, which is the ability to code, store, and recover information about faces, shapes, images, songs, sounds, smells, tastes, and feelings. Example: Remembering the melody of a classical piece of music requires our non-verbal memory.

800

770
### WORKING MEMORY
Score Received: 770

Namit Gaur has received a high score in the area of working memory, which refers to the temporary storage and manipulation of the information necessary for complex cognitive tasks. Example: When you're at the grocery store, you realize that you left your credit card at home and only have $50 in cash. You look at your cart and add up the price of all of the items that you have and remember the total. You then realize that you can't buy anything else and go to check out.

800

800
SHORT-TERM MEMORY
Score Received: 800

Namit Gaur has received a high score in short-term memory. Short-term memory is the ability to remember a small amount of information that will be used in a short period of time. Example: It's commonly accepted that we are able to store 7±2 elements in our short-term memory, like a phone number, street number, or someone's name who you have just met.
800

800

PHONOLOGICAL SHORT-TERM MEMORY
Score Received: 800

Namit Gaur has received a high score in phonological short-term memory. It is the ability to remember phonological information over a short period of time. Example: As you listen to the radio, you hear an ad that catches your attention. You memorize the store's phone number and hurry to write it down.

800

800

VISUAL SHORT-TERM MEMORY
Score Received: 800

Namit Gaur has received a high score in the area of visual short-term memory, which is the ability to temporarily remember a small amount of visual information. Example: While you're driving on the highway, you pass a sign with the 4 closest destinations. After a few seconds, you try to remember the distance to each of the destinations.
ATTENTION

706/800

800
684
DIVIDED ATTENTION
Score Received: 684

Namit Gaur has received a high score in the area of divided attention, which is the ability to do more than one action at a time, paying attention to a few different stimuli at a time. Example: You're watching TV with a friend and they put on a movie that you've already seen, so you divide your attention between the movie and your phone.

800

645

INHIBITION
Score Received: 645

Namit Gaur has received a high score in the area of inhibition, which is the ability control impulsive (or automatic) responses, and create responses by using attention and reasoning. Example: When we are working, inhibition helps us to avoid the temptation to use the mobile phone, to doodle, to get up, and so on.

800

710

UPDATING
Score Received: 710

Namit Gaur has received a high score in the area of updating, which is the ability to supervise the action that is being carried out in order to ensure that it is being properly completed. Example: If we are on our way to an important meeting, we must make sure we are taking the correct route. We will use updating to check that we are on the right track, especially if there are any streets cut or if you have to take a detour.

800

784
FOCUSED ATTENTION
Score Received: 784

Namit Gaur has received a high score in the area of focused attention, which is the ability to manage different visual and auditory stimuli over a period of time in order to prioritize actions. Example: In our day-to-day lives, we constantly use focus, such as when something falls on the floor, when making food or when cleaning up breadcrumbs from the table.

COORDINATION

719/800

800

725
HAND-EYE COORDINATION
Score Received: 725

Namit Gaur has received a high score in hand-eye coordination, which is the ability to do activities that require the simultaneous use of our hands and eyes. Example: When you realize that you need to take out money from an ATM, you need to coordinate your hands and eyes in order to hit the right buttons on the screen.
800

713
RESPONSE TIME
Score Received: 713

Namit Gaur has received a high score in the area of response time, which is the ability to perceive and respond to a simple stimulus. Example: You're driving on the road and see that the car in front of you starts breaking suddenly. You need to respond quickly in order to avoid a crash.

PERCEPTION

594/800

ESTIMATION

Score Received: 385

Namit Gaur has received a moderate score in the area of estimation, which is the ability to estimate the future location of an object based on speed and distance. Example: You're driving your car and have to move lanes in order to pass another car. To do this, you have to look around and estimate the speed and distance of the other card on the road in order to avoid an accident.
RECOGNITION

Score Received: 511

Namit Gaur has received a high score in the area of recognition, which is the ability to identify stimuli, like situations, places, people, objects, etc. that you have seen before. This makes it possible to recognize people, places, and things. Example: If someone greets you on the street, you use recognition to find out if the person's face or voice is familiar to you and identify who they are.
### SPATIAL PERCEPTION

Score Received: 623

Namit Gaur has received a high score in the area of spatial perception, which is the ability to evaluate how things are organized in space, and understand their relationship to their environment. Example: You decide to visit the new cafeteria at the mall. When you arrive, take a look at the map, locate the cafeteria in question and follow the right path to get there.
### AUDITORY PERCEPTION

Score Received: 654

Namit Gaur has received a high score in the area of auditory perception, which is the ability to perceive the difference between sounds. Example: You hear a car honking, your friend talking, and a phone ringing.

800

650

VISUAL PERCEPTION
Score Received: 650

Namit Gaur has received a high score in the area of visual perception, which is the ability to interpret the information that the eye perceives from the visual stimuli in the environment. Example: You walk down a street looking at a bus. As you approach it, its image on the retina of your eye becomes larger and larger. Certain proportions also change. However, your brain does not interpret these changes as real changes in the bus itself. You keep "seeing" the bus as the same object, no matter how close or how far away you are from it.

800

740
VISUAL SCANNING
Score Received: 740

Namit Gaur has received a high score in the area of visual scanning, which is the ability to recognize pertinent information from your environment quickly and efficiently. Example: A wide variety of sports require agile and precise detection of relevant stimuli (team-mates, rivals, a ball, a goal). If we want to pass the ball to a team-mate we will have to do a visual search to find them on the playing field, taking into account that every second is important.

03 **CONCLUSIONS**

Namit Gaur shows moderate or low scores in Evaluated areas. Because of this, we recommend making some healthy lifestyle changes, and improving social relationships and cognitive skills.

In addition to the interpretation of the areas and cognitive profile assessed, the following criteria must be taken into account by a qualified professional:

CONCLUSIONS

According to the results, Namit Gaur has a physical, social, and/or cognitive well-being that could be improved. If you think that Namit Gaur may have some difficulty that hasn't been evaluated, we recommend seeing a professional.

Start a cognitive training program to improve cognitive strengths and work on weaker ones skills. At CogniFit, we have a series of games to train executive functions and other cognitive abilities.

Use this 25% off code to get a discount on your brain training program: **CABGENERAL**.

Please make sure that all of the questions have been answered carefully and correctly and that the assessment was completed in a quiet room free from distractions, as this may alter results. The data in this report corresponds to a specific time in Namit Gaur's life and may vary over time.
